Whats Included

INFO: This folder is where all the documentation, artwork and track-list can be found.

RECORDINGS: This folder has all the original recordings created for this library.

SESSION: Contains 1 Pro Tools session with onboard recordings arranged in sync

Terminology & Nomenclature

'Onboard' refers to the microphones being placed onboard the vehicle at different points inside and outside the car. There are 6 channel recordings that include interior, exhaust and engine onboard microphones.

With 4.0 files, channels 1 and 2 will be engine, channels 3 and 4 will be exhaust.

Keywords have been optimized to only include the primary sound elements of that recording.

Credits: Nick Dixon (Sound Recordist, Sound Editor)
