The Anglo Paris was a pretty sidewheel lawn mower introduced in 1892 by Ransomes, Sims & Jefferies. The mower replaced an earlier design known as 'The Paris' that was made by Ransomes for sale in France during the 1880s.

Like most side wheel mowers produced in the UK, the Anglo Paris was sold as a less expensive and easier to use alternative to the heavier roller mowers such as Ransomes' own Automaton range.
